**STYLE AND PERFORMANCE INSIDE AND OUT**

Set apart for its superb balance of lasting beauty, strength and sustainability, metal is recognized as a primary exterior material. Alside's more than 65 years of siding manufacturing expertise further elevates the allure of steel with distinctive, high-performance profiles that reduce the need for maintenance and upkeep.

Satinwood Steel Siding is one of the most heavy-duty products in its class. From the searing heat of summer to the chilling winds of winter, Satinwood Steel offers superior protection and resists buckling that can result from expansion and contraction caused by extreme weather.

**CREATING CUSTOM STYLE**

Set your home apart with the timeless appeal of Satinwood Steel Siding. Available in three profiles and eleven designer colors, the possibilities for your remodeling or new construction project are endless. Fused with a top coat of PVC, the low-gloss finish and subtle texture capture the warmth of freshly painted wood, yet requires minimal attention to upkeep.

Alside's ColorConnect® Color Matching Systems adds the ability to coordinate your siding with other Alside exterior products and accessories including gable vents, corners posts and other decorative options found on America's most distinct homes.

-  **RESISTANCE TO HURRICANE-FORCE WINDS**  
Independently tested to withstand harsh wind forces in excess of 160 mph.
-  **IMPACT RESISTANT**  
Constructed of roll-formed 20 gauge G-90 galvanized steel for exceptional strength, hail and impact resistance.
-  **NON-COMBUSTIBLE**  
Satinwood Steel Siding is a Class A, non-combustible product that meets even the most stringent building codes.
-  **PROTECT AGAINST INSECTS**  
Resists damage from destructive insects such as termites.
-  **MAINTENANCE FREEDOM**  
Easy upkeep – no caulking, scraping or painting required.
-  **ENVIRONMENTALLY FRIENDLY**  
Eco-friendly and recyclable! 
-  **PEACE OF MIND ASSURANCE**  
Backed by a lifetime, transferable warranty by an industry-leading manufacturer. See printed warranty for details.

**THE CHOICE IS YOURS**

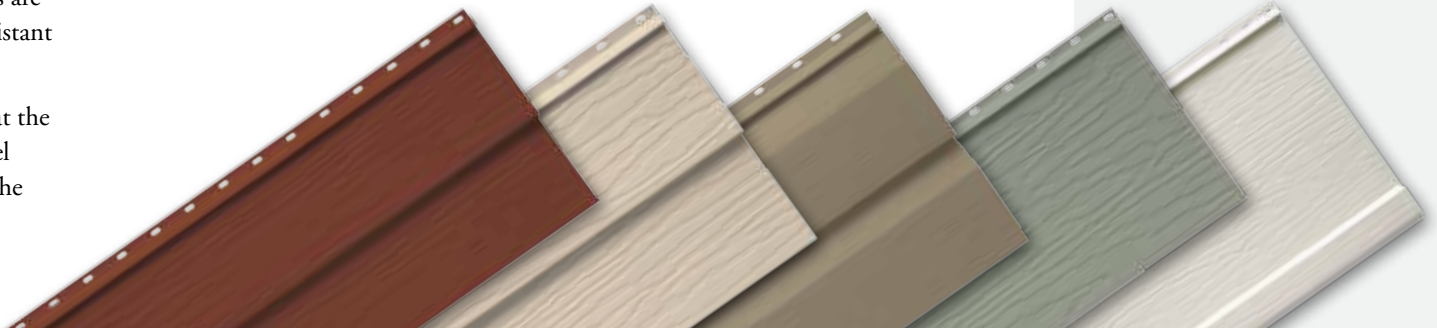

The first step to creating a beautiful and comfortable home involves choosing the right products. When it comes to siding, Satinwood Steel raises the standard on durability, performance and design – and opens the door to the collection's versatile styles and color options for your home.

Satinwood Steel provides exceptional strength and impact resistance. Wall imperfections are virtually eliminated and the roll-formed 29 gauge G-90 galvanized steel is corrosion-resistant and non-combustible for added protection to your home.

Whether you choose 5" Dutch Lap in neutral Cape Cod Gray for your vacation home at the lake or 12" Board and Batten in Tuscan Clay for a ranch in the suburbs, Satinwood Steel Siding is suitable for nearly each and every style of home, and dependably performs in the most extreme climates.

THE ALSIDE STEEL COLLECTION

*Fused with a top coat of PVC, the low-gloss finish and color-fast texture embody the warmth of freshly painted wood.*

## PEACE OF MIND WARRANTY COVERAGE

With over 65 years of manufacturing experience, Alside is pleased to offer a written pledge of lifelong quality and performance. This peace-of-mind warranty coverage is added assurance that you have not only invested in siding from a leading innovator in building products, but with proper care, your purchase is guaranteed.

Satinwood Steel Siding is backed by a lifetime limited transferable warranty including a 50 year hail protection guarantee. See warranty for product details. A copy of the warranty is available by writing to:

Alside Warranty Department  
PO Box 2010, Akron, Ohio 44309
