

Sliding Patio Door

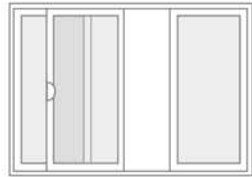

Premier Sliding Patio Door

Great Lakes Window Sliding Patio Doors are designed to provide a beautiful, seamless transition from your home to the outdoors. They glide open smoothly – perfect for entertaining during the summer months – and close tight to protect your home from the elements throughout the year. With a variety of panel configurations and style options, you can create a door that coordinates with the inside and outside of your home.

Panel Configurations

Two panel widths: 5', 6', 8'

Three panel widths: 9', 12'

Four panel widths: 10', 12', 16'

Door heights: 6'8", 6'10", 8'

6'10" door height is only available in the following panel widths: 6', 2-panel; 9' 3-panel; and 12' 4-panel doors.

Both two- and three-panel configurations are available with right-hand or left-hand operation.

Custom sizes are also available.

Sidelites and Transoms

Create a unique look for your home by adding sidelites on either side of your patio door or transoms above.

EuroGlide

Never struggle to open and close your patio door again. Our optional EuroGlide operating system offers two major innovations that allow it to glide easily with the push of a finger:

A handle that rotates 180° to actually lift the door off the sill, enabling it to glide effortlessly.

A patented ball-bearing system that enables a door weighing up to 550 pounds to glide smoothly through years of everyday use.

Locking Systems

Choose from single, dual or our unique three-point locking system, for added security.

Fiberglass Threshold

A heavy-duty fiberglass threshold and stainless steel roller guide resist frost and condensation, and provide superior strength to hold up over time.

Footbolt Lock

For additional security, select our optional footbolt lock, which secures the door even when it is partially open.

Style Options

Customize your patio door with options for both the exterior and interior of your home.
